

Subject Index

- Acknowledgment of reviewers, v
- Aflatoxin
contamination of corn hybrids (Davis et al), 467
production in high-moisture corn, effect of sorbate (Lee et al), 82
- Alcohol, distillation, of barley (Wu), 142
- α -Amylase, secondary triticale activity during kernel development (Macri et al), 267
- Alveography, quality assessment of soft white winter wheat (Rasper et al), 395
- Amaranth, isolation and partial characterization of starch from *Amaranthus hypochondriacus* (Yanez et al), 273
- Amino acids
in distillers' dried grain, NIR analysis for quality evaluation (McGuire), 155
of legume flours and protein concentrates (Bahnassey et al), 210
- Amylopectin, comparison of in wheat varieties (Kobayashi et al), 71
- Amylose, determination in maize starches (Knutson), 89
- Arrowroot, characteristics of U.S. grown (Erdman), 277
- Ascorbic acid, enzymatic oxidation and flour improvement (Cherdkiatgumchai and Grant), 197
- Baking
cake, effect of shortening emulsifier and free flour lipids on batter expansion (Donelson and Clements), 109
factors affecting breadmaking potential of secondary triticale (Macri et al), 263
hard wheat flour containing deoxynivalenol (Seitz et al), 146
microtesting for prediction (Finney and Andrews), 177
NIR spectroscopy for quality estimation (Devaux et al), 151
overgrinding effect on bread-baking properties (Okada et al), 187
test, of chapati, development of method (Haridas Rao et al), 297
- Barley
alcohol distillation; fractionation and characterization of protein-rich material from (Wu), 142
analysis of hordeins by RP-HPLC and SDS gradient PAGE (Marchylo et al), 219
cultivar identification by SDS-PAGE (Heisel et al), 500
hull-less
physiochemical and functional properties of (Bhatty), 31
review of potential (Bhatty), 97
oil additive effect on dust reduction (Lai et al), 512
- Batter, moisture content effect on fat uptake during frying (Osei-Yaw and Powers), 506
- Bioavailability, iron, comparison of in vitro methods in bread (Kadan and Ziegler), 47
- Black gram, carbohydrate profile of (Bhat and Tharanathan), 376
- Bran
influence of wheat bran and bran particle size on vitamins A and E (Kahlon et al), 490
proso millet, lipids in (Lorenz and Hwang), 387
wheat, folate content of different classes and varieties (Mullin and Jui), 516
- Bread and breadmaking
baking quality estimated by NIR spectroscopy (Devaux et al), 151
breadmaking properties of composite flours of wheat and faba bean protein preparations (Youssef and Bushuk), 357
breadmaking quality of wheat flour (Weipert and Pomeranz), 352
flour lipid effect on expansion rate and volume, resistance oven (Moore and Hoseneý), 172
French bread, flavor affected by fermentation conditions (Hironaka), 369
ingredient effect on iron solubility and chemical state (Kadan and Ziegler), 47
lipid content and composition and loaf volume of common spring wheats (Bekes et al), 327
NIR reflectance analysis (Suzuki et al), 320
properties of hull-less barley (Bhatty), 31
retention of carbon dioxide in dough (Moore and Hoseneý), 67
scab and deoxynivalenol effect on quality (Seitz et al), 146
secondary hexaploid triticale (Macri et al), 263
stability of enrichment vitamins in (Ranhotra and Gelroth), 401
wet processing of wheat flour (Wu et al), 43
wheat bread, supplemented with pigeon pea flour (Gayle et al), 136
whole grain, sensory and nutritional properties in one variety of (Rognerud et al), 207
- Bread staling, starch retrogradation effect on (Zeleznaý and Hoseneý), 407
- Brewers' condensed solubles, enzymatic hydrolysis, viscosity reduction, and fermentation (Chung et al), 124
- Buckwheat
browning and color assessment (Mazza), 361
immunological characterization of (Skerritt), 365
thiamine-binding protein in (Mitsunaga et al), 332
- Cakes and cookies
cakes, effect of
added wet wheat starch (Wu et al), 43
free flour lipids on batter expansion (Donelson and Clements), 109
cookies, stability of enrichment vitamins in (Ranhotra and Gelroth), 401
- Carbohydrates
of black gram (Bhat and Tharanathan), 376
isolation and partial characterization of starch from *Amaranthus hypochondriacus* (Yanez et al), 273

- Carbon dioxide
production in high-moisture corn, effect of sorbate (Lee et al), 82
retention in bread dough (Moore and Hosney), 67
- Cereal, tocopherols and tocotrienols in, Finland (Puronen et al), 78
- Cereal grains
pattern recognition of (Lai et al), 168
pearl millet, odor generation in (Reddy et al), 403
- Chapati
quality during storage (Venkateswara Rao et al), 131
test baking of, development of method (Haridas Rao et al), 297
- Chromatography
gas, of propionic acid in grain sorghum (Lamkin et al), 372
ion-exchange for phytate analysis (Ellis and Morris), 58
- Cooking, rice kernel hardness related to (Webb et al), 27
- Corn
aflatoxin contamination of (Davis et al), 467
alkali-cooked, physicochemical properties of (Morad et al), 255
blends, moisture detection (Pomeranz and Czuchajowska), 283
composition of, ground on Stenvert hardness tester (Pomeranz et al), 22
devices for determining breakage susceptibility (Watson and Herum), 139
distillers' dried grains, dry fractionation of (Wu and Stringfellow), 60
hardness and breakage susceptibility, methods for (Pomeranz et al), 39
high-moisture, sorbate preservation of (Lee et al), 82
mixtures of, moisture in (Martin et al), 442
SO₂ treatment to extend drying time (Tuite et al), 462
test weight, hardness, and breakage susceptibility of (Pomeranz et al), 349
- Corn dough, rheology in farinograph (Cuevas and Puche), 294
- Dehulling
of quinoa, effect on saponin content (Reichert et al), 471
of small samples with Tangential Abrasive Dehulling Device (Reichert et al), 201
- Differential scanning calorimetry
to measure retrogradation (Zelezak and Hosney), 407
for microstructural evaluation of model starch systems (Davis et al), 427
of wheat gluten (Hosney), 285
- Dough
corn, rheology in farinograph (Cuevas and Puche), 294
mixing, sucrose ester effect on (Watson and Walker), 62
retention of carbon dioxide (Moore and Hosney), 67
- Drying
modifications of wheat germ proteins (Lupano and Añón), 259
of wheat with microwaves (Campaña et al), 271
- Dust, reduction with oil additives in barley and malt (Lai et al), 512
- Dye binding, to wheat starch granule surface (Seguchi), 518
- Electrofocusing, for classification of Chinese rice varieties (Guo et al), 1
- Electron spin resonance spectroscopy, of native and gelatinized starch (Nolan et al), 287
- Electrophoresis
of hordeins for barley identification (Heisel et al), 500
PAGE and SDS-PAGE of low-molecular-weight wheat protein from two wheat classes (Zawistowska et al), 414
SDS gradient PAGE of hordeins (Marchylo et al), 219
two-dimensional
of kernel proteins of triticales and their parental species (Lei and Reeck), 116
polyacrylamide, of wheat kernel proteins (Lei and Reeck), 111
- Emulsifiers, effect on dough rheology (Watson and Walker), 62
- Energy, usable value of jojoba oil (Ranhotra et al), 459
- Enzymes, hydrolysis of brewers' condensed solubles by (Chung et al), 124
- Ergosterol, index of quality of rice (Naewbanij et al), 315
- Erratum, Khan et al (vol. 62, p. 310), 65
- Extrusion cooking
viscosity of extruded wheat starch (Mason and Hosney), 436
of wheat starch, rheology of pastes (Doublrier et al), 240
- Feedstuffs, potential of hull-less barley, review (Bhatty), 97
- Fermentation, of brewers' condensed solubles (Chung et al), 124
- Fiber
dietary
content in whole grain bread (Rognerud et al), 207
influence of wheat bran and bran particle size on bioavailability of vitamins A and E (Kahlon et al), 490
in distillers' dried grain, NIR analysis for quality evaluation (McGuire), 155
- Flour
absorption for noodle dough (Oh et al), 93
effect of reduction grinding conditions (Scanlon and Dexter), 431
field bean, heat-moisture effect on water uptake (Pilosof et al), 456
mesquite pod, physical and chemical properties of (Zolfaghari et al), 104
millet, lipids in (Lorenz and Hwang), 387
overgrinding effect on properties of flour and dough (Okada et al), 187
pea, batter properties of (Osei-Yaw and Powers), 506
pigeon pea, nutritional and organoleptic evaluation of wheat breads supplemented with (Gayle et al), 136
rice, rapid quality test for (Sharp), 325
soy, effect of protein on fat absorption (Martin and Davis), 252
wet processing for breadmaking (Wu et al), 43
wheat
mineral composition and variation (Peterson et al), 183
oxidative enzymes in (Cherdkiatgumchai and Grant), 197
viscometric indexes of (Weipert and Pomeranz), 352
- Folate, content of wheat brans (Mullin and Jui), 516
- Fractionation, dry, of corn distillers' dried grains and CDG with solubles (Wu and Stringfellow), 60
- Gliadin, comparison of PAGE and HPLC analyses of (Lookhart et al), 497
- Globoid crystals, in wheat aleurone cells (Batten and Lott), 14
- Glucose syrup, total carbohydrate analysis (Brooks et al), 465
- Glucose tolerance, effect of high-chromium bakers' yeast on (Ranhotra and Gelroth), 411
- Gluten
glassy polymer (Hosney), 285
rheological properties, durum wheat quality (Autran et al), 390
structure and function of (Belitz et al), 336
- Grain, distillers' dried, quality evaluation by NIR analysis (McGuire), 155
- Hardness, of wheat section (Pomeranz et al), 513
- Hordein
identification of barleys by (Heisel et al), 500
quantitative and qualitative analysis of sequentially extracted proteins from barley and malt (Marchylo et al), 219
- HPLC
quantitative-reversed phase analysis of sequentially extracted hordeins from barley and malt (Marchylo et al), 219
reversed-phase, of low-molecular-weight wheat protein from two wheat classes (Zawistowska et al), 414
of sorghum grain storage proteins (Sastry et al), 420
tocopherols and tocotrienols in Finnish cereal products (Puronen et al), 78
- Image analysis, of wheat classes and varieties (Zayas et al), 52
- Instructions to authors, iii
- Instruments and instrumentation
corn breakage susceptibility measurement (Watson and Herum), 139
mixograph, for noodle-dough absorption (Oh et al), 93
Stenvert hardness tester for gross composition of corn (Pomeranz et al), 22
- Iron
content in whole grain bread (Rognerud et al), 207
solubility and chemical state in bread, ingredient effect (Kadan and Ziegler), 47
- Isoelectric focusing, of sorghum grain storage proteins, relationship to genetic variation (Sastry et al), 420
- Legumes
blended with durum semolina (Bahnassey et al), 210, 216
phytate content of beans, determined by new chromophore and compared to Bartlett method (Mohamed et al), 475
- Lipids
absorption by fried donuts (Martin and Davis), 252
binding by protein films and heated prime wheat starch (Seguchi), 311
blood, effect of high-chromium bakers' yeast on (Ranhotra and Gelroth), 411
cake batter expansion effects (Donelson and Clements), 109
composition of flours differing in sulfur content (MacRitchie and Wrigley), 378
content and composition of, low-molecular-wheat protein association (Zawistowska et al), 414
effect on expansion rate and bread volume (Moore and Hosney), 172
NIR reflectance for estimation in bread (Suzuki et al), 320
in proso millet flours and brans (Lorenz and Hwang), 387
relationship between content and composition and loaf volume for common spring wheats (Bekes et al), 327
spaghetti cooking quality role (Matsuo et al), 484
waxy, molecular species of, in wheat grain (Ohnishi et al), 193

- Magnesium, isolation and identification of phytates from rice bran (Champagne et al), 160
- Maize
 amylose determination in starches of (Knutson), 89
 protein changes during tortilla making (Ortega et al), 446
- Malt, oil additive effect on dust reduction (Lai et al), 512
- Maltodextrin, total carbohydrate analysis (Brooks et al), 465
- Mesquite pods, physical and chemical properties of (Zolfaghari et al), 104
- Methodology, determination of phytic acid and phosphorus using chromogenic reagent (Mohamed et al), 475
- Methods
 buckwheat browning and color assessment (Mazza), 361
 for corn hardness and breakage susceptibility (Pomeranz et al), 39
 detection of mixture of wet and dry corn (Pomeranz and Czuchajowska), 283
 to determine amylographic viscosity of rice flour (Sharp), 325
 development of, for test baking of chapati (Haridas Rao et al), 297
 hemolytic determination of saponin content in quinoa (Reichert et al), 471
 for milling of wheat (Finney and Andrews), 18
 molecular comparison of alcohol-soluble wheat and buckwheat proteins (Skerritt), 365
 NIR reflectance for bread (Suzuki et al), 320
 screening, for indirect determination of sorghum hardness (Pomeranz), 36
 texture (hardness and softness) variation among individual soft and hard kernels (Gaines), 479
- Microwave
 drying of rice, effect on quality and properties (Wadsworth and Koltun), 346
 heating effect on drying wheat (Campaña et al), 271
- Millet
 pearl, odor generation in (Reddy et al), 403
 proso
 lipids in flours and bran of (Lorenz and Hwang), 387
 tempering parameter effect on extraction and ash of flour, and partial characterization of proso starch (Yanez and Walker), 164
- Milling
 abrasive dehulling of small samples with Tangential Abrasive Dehulling Device (Reichert et al), 201
 of hard wheat, distribution of deoxynivalenol (Seitz et al), 146
 of heavily ground flour using roller mills (Okada et al), 187
 of HRS farina, effect of reduction grinding conditions (Scanlon and Dexter), 431
 microtesting for prediction (Finney and Andrews), 177
 properties of newly harvested hard wheat during storage (Posner and Deyoe), 451
 rice kernel hardness related to (Webb et al), 27
 tempering parameter effect on extraction and ash of proso millet flours (Yanez and Walker), 164
 of wheat, conditioning method for (Finney and Andrews), 18
- Minerals
 phosphorus forms in wheat grains (Batten), 384
 variation in wheat grain composition (Peterson et al), 183
- Moisture
 of corn, determination of (Pomeranz et al), 39
 in corn mixtures (Martin et al), 442
- Mycotoxin, field contamination of corn with aflatoxin (Davis et al), 467
- Oat groats, commercial processing effect on (Lookhart et al), 280
- Oil, jojoba, usable energy value of (Ranhotra et al), 459
- Packaging, shelf-life of brown rice affected by (Sharp and Timme), 247
- PAGE, for identification of barleys (Heisel et al), 500
- Pasta
 dry-oriental noodles, flour optimum water absorption (Oh et al), 93
 lipid effect on (Matsuo et al), 484
 spaghetti, from legume-semolina blends (Bahnassey et al), 210, 216
 statistical evaluation of technological and biochemical tests, durum wheat (Autran et al), 390
- Pattern recognition, of cereal grains (Lai et al), 168
- Phenols, of sorghum, genotype effect on (Hahn and Rooney), 4
- Phosphorus, deficiency in developing wheat (Batten and Lott), 14
- Physical testing, alveography of soft wheat flours (Rasper et al), 395
- Physicochemical properties, rice, effect of microwave treatments (Wadsworth and Koltun), 346
- Phytate
 analysis, resin selection for (Ellis and Morris), 58
 new chromophore for phytic acid determination (Mohamed et al), 475
- total P relationship in wheat grains (Batten), 384
- Phytic acid
 soluble magnesium and potassium phytates from rice bran (Champagne et al), 160
 in winged bean cultivars (Kantha et al), 9
- Polymorphism, gliadin PAGE and HPLC patterns compared (Lookhart et al), 497
- Potassium, isolation and identification of phytates from rice bran (Champagne et al), 160
- Prolamin, in Chinese rice, classification by electrofocusing (Guo et al), 1
- Propionic acid, gas-chromatographic determination in grain sorghum (Lamkin et al), 372
- Protease, secondary triticale activity during kernel development (Macri et al), 267
- Protein
 albumin, globulin, gliadin, and glutenin fractions of wheat kernels (Lei and Reeck), 111
 in distillers' dried grain, NIR analysis for quality evaluation (McGuire), 155
 durum wheat gliadin (PAGE) and glutenin (SDS-PAGE), pasta quality (Autran et al), 390
 fractions and quality changes during tortilla making (Ortega et al), 446
 gluten, structure and function of (Belitz et al), 336
 heat denaturation of wheat germ proteins (Lupano and Añón), 259
 isolate, heat-moisture effect on water uptake (Pilosof et al), 456
 lipid binding by heated films (Seguchi), 311
 low-molecular-weight wheat, characterization of (Zawistowska et al), 414
 sorghum grain, separation by HPLC and isoelectric focusing (Sastry et al), 420
 soybean, qualitative analysis by densitometry on gel electrophoresis (Sato et al), 493
 starch granule, associated with endosperm softness in wheat (Greenwell and Schofield), 379
 thiamine-binding, in buckwheat seed (Mitsunaga et al), 332
 of triticales and their parental species (Lei and Reeck), 116
 wheat, relation to mineral levels in grain (Peterson et al), 183
- Quinoa, saponin reduction by abrasive dehulling (Reichert et al), 471
- Rheology
 of corn dough, prepared from Venezuelan precooked flour (Cuevas and Puche), 294
 of extruded and drum-dried starch pastes (Doublie et al), 240
 mechanical evaluation of soy extrudates (Kazemzadeh et al), 304
- Rice
 brown, shelf-life of (Sharp and Timme), 247
 Chinese, classification by electrofocusing (Guo et al), 1
 ergosterol content (Naewbanij et al), 315
 flour, rapid quality test for (Sharp), 325
 kernel hardness relation to milling, cooking, and processing (Webb et al), 27
 microwave treatment effect on quality and properties (Wadsworth and Koltun), 346
- Rice bran, soluble magnesium and potassium phytates from (Champagne et al), 160
- Rye, two-dimensional electrophoresis of kernel proteins (Lei and Reeck), 116
- Saponin, hemolytic determination of, in dehulled quinoa (Reichert et al), 471
- Scanning electron microscopy
 of arrowroot starch (Erdman), 277
 commercial processing effect on properties of oat groats (Lookhart et al), 280
 structural evaluation of soy extrudates (Kazemzadeh et al), 304
- Sensory evaluation, effect of fermentation conditions on evaluation of French bread (Hironaka), 369
- Shortening, influence of carbon dioxide retention in bread dough (Moore and Hosney), 67
- Sorbate, preservation of high-moisture corn, prevention of aflatoxin production (Lee et al), 82
- Sorghum
 dehulling of small samples with Tangential Abrasive Dehulling Device (Reichert et al), 201
 gas-chromatographic determination of propionic acid added as preservative (Lamkin et al), 372
 genotype effect on tannins and phenols of (Hahn and Rooney), 4
 hardness indirect determination of (Pomeranz), 36

- tryptophan and lysine levels in normal and high-lysine selections (Hassen et al), 175
- Sorghum grain, storage proteins, genetic variation of (Sastry et al), 420
- Soy glycinin, succinylation effect on (Kim and Kinsella), 342
- Soy protein, 11S and 7S lysozyme interactions (Damodaran and Kinsella), 381
- Soybeans
 mechanical and ultrastructural evaluation of extrudates (Kazemzadeh et al), 304
 proteins, quantitative analysis by densitometry on gel electrophoresis (Sato et al), 493
- Spin labels, fatty acid, effect on starch (Nolan et al), 291
- Starch
Amaranthus hypochondriacus, starch isolation and partial characterization (Yanez et al), 273
 arrowroot (Erdman), 277
 comparison of amylopectin structures in wheat varieties (Kobayashi et al), 71
 fatty acid spin label effect on (Nolan et al), 291
 granule, protein associated with endosperm softness in wheat (Greenwell and Schofield), 379
 maize, determination of amylose in (Knutson), 89
 microstructural evaluation of (Davis et al), 427
 native and gelatinized-, electron spin resonance study of (Nolan et al), 287
 prime wheat, lipid binding by (Seguchi), 311
 proso millet, partial characterization of (Yanez and Walker), 164
 retrogradation, effect of water on (Zelezak and Hosney), 407
 total carbohydrate analysis (Brooks et al), 465
 wheat
 extrusion cooking and drum drying of, rheology of pastes (Doublier et al), 240
 viscosity of extruded (Mason and Hosney), 436
- Storage
 chapati, changes in quality characteristics of (Venkateswara Rao et al), 131
 of confectionery sunflower kernels (Buendia and D'Appolonia), 85
 milling properties of newly harvested hard wheat during (Posner and Deyoe), 451
 of pearl millet, odor generation in (Reddy et al), 403
 of rice, ergosterol content (Naewbanij et al), 315
 shelf-life of brown rice affected by (Sharp and Timme), 247
 SO₂ treatment to extend corn drying time (Tuite et al), 462
- Storage protein, accumulation in wheat endosperm (Bechtel and Barnett), 232
- Succinylation, of soy glycinin (Kim and Kinsella), 342
- Sulfur, deficiency in wheat, lipid content and composition (MacRitchie and Wrigley), 378
- Sulfur dioxide, to extend corn drying time (Tuite et al), 462
- Sunflower, confectionery kernels, storage of (Buendia and D'Appolonia), 85
- Tannins
 of sorghum, genotype effect on (Hahn and Rooney), 4
 in winged bean cultivars (Kantha et al), 9
- Texture, hardness and softness variation among individual soft and hard kernels (Gaines), 479
- Thiamine, binding protein in buckwheat (Mitsunaga et al), 332
- Tocopherols, in cereal products from Finland (Puronen et al), 78
- Tocotrienols, in cereal products from Finland (Puronen et al), 78
- Tortillas
 protein changes using normal and quality protein maize (Ortega et al), 446
 traditional vs. presoaking procedures (Morad et al), 255
- Critical
 breadmaking potential of, factors affecting (Macri et al), 263
 changes in enzyme activities, protein content during kernel development (Macri et al), 267
 two-dimensional electrophoresis of kernel proteins (Lei and Reeck), 116
- Trypsin inhibitor, in winged bean cultivars (Kantha et al), 9
- Tryptophan, improved ion-exchange method for analysis in cereals (Hassen et al), 175
- Ultrastructure, of developing wheat endosperm (Bechtel and Barnett), 232
- Viscosity, reduction of brewers' condensed solubles (Chung et al), 124
- Vitamins
 A and E, influence of wheat bran and bran particle size on bioavailability of (Kahlon et al), 490
 enrichment, stability of in bread and cookies (Ranhotra and Gelroth), 401
- Water uptake, of bean flour and protein isolate (Pilosof et al), 456
- Wheat
 alveography of soft wheat (Rasper et al), 395
 changes in grain phosphorus, fractions with ploidy (Batten), 384
 common spring, prediction of loaf volume from lipid content and composition (Bekes et al), 327
 composite, breadmaking properties of wheat and faba bean (Youssef and Bushuk), 357
 dehulling of small samples with Tangential Abrasive Dehulling Device (Reichert et al), 201
 discrimination of bread-baking quality by NIR spectroscopy (Devaux et al), 151
 drying effect on germ proteins (Lupano and Añón), 259
 durum
 technological and biochemical tests for quality assessment (Autran et al), 390
 two-dimensional electrophoresis of kernel proteins (Lei and Reeck), 116
 effect of reduction grinding conditions on HRS flour properties (Scanlon and Dexter), 431
 grain endosperm softness associated with starch granule protein (Greenwell and Schofield), 379
 hard, milling properties during storage (Posner and Deyoe), 451
 hard red winter, deoxynivalenol distribution in millstreams (Seitz et al), 146
 hardness
 affected by chromosome number and species (Williams), 56
 of wheat sections (Pomeranz et al), 513
 image analysis for discrimination between classes and varieties (Zayas et al), 52
 kernel proteins, two-dimensional electrophoresis of (Lei and Reeck), 111
 low-molecular-weight protein, characterization of, two classes (Zawistowska et al), 414
 microtesting for quality evaluation (Finney and Andrews), 177
 microwave heating effect on (Campaña et al), 271
 phosphorus nutrition influence on globoid crystal composition (Batten and Lott), 14
 protein, comparison with buckwheat (Skerritt), 365
 soft red winter, conditioning method for milling of (Finney and Andrews), 18
 starch granules, dye binding to surface of (Seguchi), 518
 starchy endosperm development (Bechtel and Barnett), 232
 sulfur deficiency in, lipid composition and content (MacRitchie and Wrigley), 378
 texture (hardness and softness) variation among individual soft and hard kernels (Gaines), 479
 varieties, comparison of amylopectin structures (Kobayashi et al), 71
 viscometric indexes of (Weipert and Pomeranz), 352
 waxy lipids in, composition and molecular species of (Ohnishi et al), 193
 winter, chemical composition and nutritive value of kernels of (Anderson et al), 75
- Winged bean, nitrogen, phytic acid, and mineral solubility (Kantha et al), 9
- Yeast, bakers', effect on glucose tolerance and blood lipids (Ranhotra and Gelroth), 411
- Yellow berry, in wheat (Anderson et al), 75
